A-Level Geography

Like GCSE your A-level Geography is split into Physical and Human Geography. These are taught concurrently by two teachers. You will have 3 Physical geography lessons and 3 Human Geography lessons per fortnight. You can find the specification [here](#).

For both of the following questions you need to outline your opinion and arguments, using evidence to back up your stance. These two questions will be explored in the first term back and we will be discussing and debating these two questions, so please be ready with your notes, research and arguments!

Use the suggested resources below to help you with your research, but we encourage you to do your own investigation and research, so you have different arguments to use.

Question 1: 'Globalisation is positive to all.' To what extent do you agree with this statement?

Resource: What is globalisation youtube video:
